

Preconditioning of Greenland snow prior to melt events

Von P. Walden¹

¹Earth and Space Research, Seattle, Washington USA

Key Points:

- This work pertains to the Arctic region.
- The Greenland Ice Sheet (GrIS) is undergoing a complete transformation due to global warming.
- We SLEIGH'd it!!

Abstract

Here is my abstract. This paper is going to be really good!

Plain Language Summary

The summary for this paper is that it is really good!!

1 Introduction

This is the introduction of the paper.

2 Data

We used cool data from the SLEIGH.

3 Methods

The back trajectory analysis rocks.

4 Results and Discussion

Lots of amazing results with compelling discussion.

5 Conclusions

We conclude that this is an awesome paper.

Open Research
