

1 **Preconditioning of Greenland snow prior to melt events**

2 **Von P. Walden¹**

3 ¹Earth and Space Research, Seattle, Washington USA

4 **Key Points:**

- 5 • This work pertains to the Arctic region.
- 6 • The Greenland Ice Sheet (GrIS) is undergoing a complete transformation due to
- 7 global warming.
- 8 • We SLEIGH'd it!!

Abstract

Here is my abstract. This paper is going to be really good!

Plain Language Summary

The summary for this paper is that it is really good!!

1 Introduction

This is the introduction of the paper.

2 Data

We used cool data from the SLEIGH.

3 Methods

The back trajectory analysis rocks. Knuteson et al. (2004b) and Knuteson et al. (2004a) did some great work. Walden et al. (2005) was a novel paper!

4 Results and Discussion

Lots of amazing results with compelling discussion.

5 Conclusions

We conclude that this is an awesome paper.

Open Research
